Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the "upright support" has not been sufficiently defined in terms of its location and function. The claim should set forth that the upright support extends upwardly from the base part so as to provide additional support for the seat shell, and that the rotational mount between the seat shell and the upright support is spaced apart from the lower rotational mount, thereby clearly and positively defining the invention.

In claim 9, the reference to "sit-up seat" and "infant carrier" forms is vague and should be set forth in structural terms.

Claims 33-36 appear to be redundant.

Claims 1-36 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nania, Hampton, Omshi et al, DaSilva, Pufall, and Adachi show various features of the invention.
